PROFESSIONAL SUMMARY

Ambitious and hands-on B.Tech student specializing in Computer Science Engineering (AI & ML). Passionate about blending hardware and software to build practical solutions. Experienced in frontend web development and building smart IoT hardware systems. Eager to leverage curiosity and foundational knowledge in C++, Machine Learning, and web technologies to contribute to innovative tech environments.

EDUCATION

KIET Deemed to be University — **Ghaziabad, UP**

B.Tech in Computer Science and Engineering (AI & ML) — First Year — *Expected Graduation: 2030*

Holy Cross School — **Laksar, Haridwar**

Class XII (CBSE) — Percentage: 88.6% — *2026*

Holy Cross School — **Laksar, Haridwar**

Class X (CBSE) — Percentage: 93.2% — *2024*

TECHNICAL SKILLS

Languages: C++, HTML, CSS, JavaScript, Embedded C
Technologies & Domains: IoT (Internet of Things), Arduino, Basics of Machine Learning (ML)
Hardware Modules: IR Sensors, MPU6050 (Accelerometer/Gyroscope), Microcontrollers
Tools: GitHub, Vercel

PROJECTS

IoT Smart Parking System — **Hardware & IoT**

- Developed a smart, hardware-based parking system designed to optimize parking space allocation.
- Integrated IR sensors with a microcontroller to accurately monitor and display parking slot availability in real-time, reducing manual oversight.

IoT Posture Corrector Indicator (Upcoming) — **Hardware & IoT**

- Designing an ergonomic, smart hardware solution to monitor physical body alignment.
- Utilizing an MPU6050 module to detect tilt and orientation, triggering real-time alerts to help the user correct their sitting posture and prevent back strain.

Netflix Clone — **Frontend Web**

- Developed a responsive web application recreating the core user interface and visual design of the Netflix platform.
- Utilized modern HTML, CSS, and JavaScript to build out interactive UI components and deployed the final build via Vercel.
